DOMANDE PROVA ORALE IDONEITA' LINGUA INGLESE

TESTI ESTRATTI

1.	<p>Civil protection encompasses preventive measures to reduce the impact of future emergencies or disasters and aid delivered to populations in need following a natural or man-made disaster.</p> <p>Depending on the nature of the disaster, this aid can take different forms, such as:</p> <ul style="list-style-type: none">• search and rescue operations• forest and urban firefighting• medical personnel deployment• medical equipment and medicines• water purification• temporary emergency shelter
2.	<p>Extreme weather events resulting from climate change are becoming more frequent, intense and persistent.</p> <p>That is why, in March 2022, the EU Council adopted conclusions calling for the further adaptation of civil protection systems to the consequences of climate change, in terms of prevention, preparedness, response and recovery.</p>
3.	<p>The Civil Protection Department has been grounded in the offices of the Presidency of the Council of Ministers since 1982. The Department has the fundamental role of gathering and coordinating the national resources necessary and ensure assistance to the population in case of emergency.</p> <p>The Department becomes the junction point of the National Service of Civil Protection. The Department carries out tasks of guidance, promotion and coordination of the entire National Service of Civil Protection.</p>
4.	<p>Weather forecasts for civil protection purposes differs from the classic "weather forecasts". They highlight potentially harmful situations to people or things.</p> <p>Mayors have the responsibility to activate emergency plans, inform citizens about risk situations and decide the measures necessary to protect the population against flooding, landslides and floods.</p>
5.	<p>The voluntary work of Civil Protection was established as a consequence of the great emergencies that have hit Italy in the last 50 years.</p> <p>The civil protection volunteers, over the years, have become an organized, trained and prepared reality, representing all the professions and knowledge of the society. An extraordinary resource in terms of skills and operational capacity that counts more than 5 thousand organizations throughout the country.</p>

TESTI NON ESTRATTE

6.	<p>Science today is not yet able to forecast the exact time and place for future earthquakes. The only forecast possible is of a statistical kind, based on knowledge of past seismicity in Italy therefore on the recurrence of earthquakes. We know which areas in the country run a</p>
